PROFESSIONAL PROFILE

Final year Computer Science student specializing in Data Analytics and Systems Analysis. I combine a strong technical foundation (Kotlin, SQL, Python, Web Dev) with 3 years of commercial experience in high-pressure roles. My goal is to transition from software development into technology entrepreneurship, using my background in product design, user research, and agile development to build viable, scalable business solutions. Multilingual (English, Burmese, Hindi, Nepali).

EDUCATION

University of Chester | BSc (Hons) Computer Science | Predicted Grade: 2:1 (Targeting First Class).

Basic Education High School, Myanmar | Graduated 2019

- Ranking: Top 0.1% of students nationwide.
- Result: 6 Distinctions including Physics (91%), Chemistry (90%), and Mathematics (82%).

TECHNICAL PROJECTS

Digital Sheet Music Management System (Dissertation) | Kotlin, Android, UI/UX

- Product Strategy: Identified a market gap for musicians requiring digital workflow solutions and designed a native Android application to replace physical sheet music.
- Execution: Managed the full SDLC from user research and interface design to backend implementation, conducting feasibility studies to ensure professional standards were met.

Chester Military Museum Application (Group Project) | Kotlin, Android, Agile

- Client Management: Acted as technical liaison for the Museum, translating educational goals into technical features.
- Delivery: Lead developer in a Scrum team, successfully deploying a functional prototype to enhance visitor interactivity within a strict 1-month deadline.

PROFESSIONAL EXPERIENCE

Bartender | Popcorn Bar, Chester | Dec 2024 – Present

- Sales & Hustle: Consistently rank as a top weekly seller by identifying customer needs and upselling premium products.
- Resilience: Manage high-volume service in a busy venue, resolving conflicts and maintaining quality under pressure.
- Operations: Trusted with strict inventory controls, cash handling, and closing duties.

Team Member | KFC, Chester | Sep 2023 – Nov 2024

- Leadership: Selected to train new staff members on operational procedures and safety standards.
- Reliability: Managed high-volume POS transactions with 100% financial integrity and accuracy.

TECHNICAL SKILLS

- Languages: Kotlin, Python, SQL, Java, Swift, C++, C#, HTML, CSS, JavaScript.
- Development: Android Studio, VS Code, Visual Studio, PyCharm, Xcode, Git/GitHub.
- Data & Tools: Microsoft Excel (Pivot Tables), SQL Server, GitLab.
- Soft Skills: Requirement Gathering, Public Speaking, Problem Solving, Adaptability.
